DETAILED ACTION

Claims 1-28 and 30-52 remain pending.

Response to Arguments

The Applicants arguments filed on October 16, 2004 have been fully considered.

Claim Rejections - 35 USC §101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 24, 27, 30, 31 33 and 39 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either an asserted watermarking utility or a well established utility. The Applicant claims no mechanism for detection of input sequence or mechanism for detecting a watermark.

Claim 1, 24, 27, 30, 31 33 and 39 also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a watermarking utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Allowable Subject Matter

Claims 18-23, 32,34-38 and 40-54 are allowable.

Claim 2-17, 25,26 and 28 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
